

CASE STUDY

FOAM FORGE LTD

WWW.FOAMFORGE.CO.UK

Established in 1994, FoamForge was set up to respond to the need for a specialist, foam moulding service.

Operating in diverse sectors, the company offers a one-stop shop through from design to volume production, and all the stages in between. Each project is overseen by the founder and Managing Director, Oliver Granger, ensuring quality and expertise. With over a million components made, FoamForge has learnt to strike a strong relationship with clients all over the globe, creating partnerships to develop innovative products.

Oliver comments “We believe that it is this expertise in facilitating the process from ideation through to production that truly sets us apart. We aim to provide a service tailored to each client’s needs from a small scale one-off prototype to runs of thousands.”

Oliver continues “Nigel was introduced to us by a neighbouring business owner as Nigel had been of help to that business with its plans. Following an initial visit, Nigel connected us with a local grant scheme aimed at supporting capital equipment purchases for businesses like ours with a strong eco-ethos / low-carbon agenda.”

“Nigel supported us through the application process and we were successfully awarded a £7k grant to purchase specialist equipment to enhance our production capability. Nigel was a great help in alerting us to the opportunity, introducing us to it and then offering suggestions when reviewing our application”, Oliver concludes.

“It was a pleasure working with FoamForge in this way. Having the opportunity to visit a truly innovative business and learn something of its skill and expertise is a genuine privilege”, Nigel comments.
